

Athens, 14. 11. 2022

Dear Colleagues,

We ask the president of central board of health of the Greek health ministry, Prof. Dimitrios Mpoumpas (boumpasd@uoa.gr), to evaluate our research protocol. He told us that the central board of health is not responsible for that reason. Afterwards, we ask the committee of bioethics and technoethics (secretariat@biothics.gr) to evaluate our research protocol. They told us also that they are not responsible for that.

There is no legislative framework in Greece, by which private researches, who work as freelancers can be evaluated by the above committees regarding research protocols. We do not belong to any hospital or university. In this case, the research protocol could be evaluated from the committee of the hospital or university. On the other hand, we are not prohibited from doing research. We suggest, if possible, that your own committee evaluates our research protocol.
